## NAVIGATOR TXB EVOLUTION

The evolution of the diagnosis, designed and developed specifically for the marine environment.

The characteristics of the hardware make it compatible with all currently existing protocols, its integrated 16-pole CPC connector, allows the use of all diagnostic cables. It is compatible with AXONE NEMO and PC. Thanks to Bluetooth technology, the technician can make a comfortable diagnosis without wires, even from the jetty.

Extremely powerful, they allow the mechanic to easily manage the map files. The CAN standards supported include the possibility of CAN single wire management and a further CAN controller for the diagnosis of more networks.

It allows the recording of the diagnosis session in "dynamic tests" mode, that is to say with the boat in motion, to locate specific faults that could not be verified in the mooring. The interface reconstructs a complete panorama of the situation in which the anomaly has been verified, providing important elements of analysis to identify the causes of the failure.

## NAVIGATOR TXB EVOLUTION

La evolución de la diagnosis, diseñado y desarrollado específicamente para el ambiente Marino.

Las características del hardware lo compatibilizan con todos los protocolos actualmente existentes, su conector CPC de 16 polos integrados, permite el uso de todos los cables de diagnosis. Es compatible con AXONE NEMO y PC. Gracias a la tecnología Bluetooth el técnico podrá realizar una cómoda diagnosis sin cables de por medio, incluso desde el pantalán.

Extremadamente potente, permite al mecánico una gestión fácil de los archivos de mapa. Los estándares CAN soportados incluyen la posibilidad de gestión CAN single wire y un CAN controller más para la diagnosis sobre más redes.

Permite la grabación de la sesión de diagnosis en modalidad "pruebas dinámicas", es decir con la embarcación en movimiento, para localizar averías específicas que no se podrían verificar en el amarre. La interfaz reconstruye una panorámica completa de la situación en la que la anomalía se ha verificado, proporcionando importantes elementos de análisis para identificar las causas de la avería.

## NAVIGATOR TXB EVOLUTION

L'evoluzione della diagnosi, disegnato e sviluppato specificamente per l'ambiente Marino.

Le caratteristiche hardware lo rendono compatibile con tutti i protocolli attualmente esistenti, il suo connettore CPC 16 poli integrato consente l'utilizzo di tutti i cavi diagnostici. E' compatibile con AXONE NEMO e PC. Grazie alla tecnologia Bluetooth il tecnico potrà realizzare una diagnosi senza cavi in mezzo, anche dal molo.

Estremamente potente, permette al meccanico una gestione facile degli archivi della mappa. Gli standard CAN supportati offrono la possibilità di gestire: CAN single wire e un altro CAN controller per eseguire le diagnosi su più reti.

Permette la registrazione di una sessione di diagnosi in modalità "prova dinamica", ovvero con l'imbarcazione in movimento, per constatare avarie specifiche che non si possono verificare in officina. La sua interfaccia permette di ricostruire una panorámica completa della situazione in cui l'anomalia si è verificata, fornendo gli elementi per identificare le eventuali avarie.

Abrazadera U de acoplamiento (39385A1) en modelos en línea.

Il giogo terminale di giunzione a giunto U (39385A1) ha utilizzato i modelli on-line in linea.

USO DE MODELOS ANTIGUOS DE COLAS EN MODELSO MERCURISER IR-IMR  
USE OF OLDER MODEL STERN DRIVE UNITS ON MERCURISER IR-IMR MODELS  
UTILIZZO DI MODELLI OLDER PIEDE SUI MODELLI IR-IMR MERCURISER

Mercury Marine no recomienda el uso de colas de modelos antiguos en modelos IR-IMR, ya que estas unidades no se acoplarán satisfactoriamente con el ensamblaje del transom. Además, las unidades en serie del modelo anterior, están equipadas con una horquilla de acoplamiento de unión en U (39385A1). Este eje es más corto que el (59830A1) usado en las unidades de impulsión de popa IR-IMR, y por lo tanto no acoplará completamente las estrías del motor. El uso del modelo más antiguo en un modelo de IR-IMR llevará al fallo de spline para acoplar al eje.

Mercury Marine does not recommend the use of older model stern drive units on IR-IMR models, as these units will not mate up satisfactorily with the transom assembly. In addition, the older model in-line stern drive units are equipped with U-joint coupling end yoke (39385A1). This yoke is shorter than yoke (59830A1) used on the IR-IMR stern drive units, and therefore will not fully engage the engine coupler splines. Use of an older in-line model stern drive unit on a IR-IMR model will result in a spline failure to coupling an/or yoke.

Mercury Marine non ha raccomandato l'uso di trasmissione a poppa più vecchie su modelli IR-IMR, in quanto queste unità non si addicono in modo soddisfacente con l'assemblaggio del trampolo. In aggiunta, le unità di comando a poppa in linea in versione anteriore sono dotate di giogo terminale di giunzione a U (39385A1). Questo giogo è più corto del giogo (59830A1) usato sulle unità di azionamento a poppa IR-IMR e pertanto non impegna completamente le spline di accoppiatore del motore. L'uso di un'unità anteriore di tipo a poppa modello in linea su un modello IR-IMR provocherà un errore di spline per accoppiare un / o giogo.

Diseñado para capturar el tremendo par de los motores **D4** y **D6**, la geometría de la pala patentada proporciona la interacción óptima entre las hélices delanteras y traseras para una eficiencia sobresaliente y un funcionamiento sin problemas. El gran área de la pala y la gran resistencia aseguran el máximo agarre y maniobrabilidad. La aleación nibral (níquel-bronce-aluminio) extremadamente fuerte garantiza un crecimiento mínimo y una excelente durabilidad. Su completo aislamiento de goma y aislamiento galvánico lo hace perfectamente compatible con las hélices **DPH**.

Designed to capture the tremendous torque from the **D4 & D6** engines, the patented blade geometry provides optimal interaction between front and rear propellers for outstanding efficiency and smooth and comfortable operation. The large blade area and great strength ensure maximum grip and maneuverability. The extremely strong nibral (nickel - bronze - aluminium) alloy ensures minimum growth and excellent durability. Complete with shock-absorbing rubber brushing and galvanic isolation makes it perfectly matched for the **DPH** drives.

Progettata per ottimizzare la straordinaria coppia dei motori **D4 e D6**, la geometria della pala brevettata offre un'interazione ottimale tra eliche anteriori e posteriori per un'efficienza eccezionale ed un funzionamento fluido e confortevole. L'ampia area della pala e la grande robustezza garantiscono la massima aderenza e manovrabilità. La lega nibral (nickel - bronzo - alluminio) estremamente robusta garantisce una crescita minima e un'eccellente durata. Completo di gomma ammortizzante e isolamento galvanico lo rende perfettamente abinabile ai **DPH**.

# IMPULSORES IMPELLER GIRANTE

## SUGERENCIAS TÉCNICAS TECH TIPS SUGGERIMENTI TECNICI

**SHERWOOD da tres sugerencias sencillas para instalar un impulsor nuevo:**

- 1 Use un lubricante con base NO derivada del petróleo (por ejemplo, silicona o agua jabonosa) para instalar el impulsor de una forma más sencilla.
- 2 Instale el impulsor en el eje con un movimiento rotatorio. Nunca fuerce el impulsor sobre el eje. Debe moverse libremente sobre el eje para un cebado y funcionamiento adecuados.
- 3 Aplique una pequeña cantidad de lubricante con base NO derivada del petróleo para fijar el aro tórico en su sitio y coloque la tapa.

SHERWOOD recomienda inspeccionar detenidamente el impulsor al realizar el mantenimiento de la bomba. Reemplace el impulsor si observa lo siguiente: desgarro o rotura en alguna de las palas del impulsor. Flexione las palas para poder examinarlas mejor.

**EL RECALENTAMIENTO ES LA CAUSA PRINCIPAL DEL DESGASTE PREMATURO DEL MOTOR. PARA MANTENER EL BUEN RENDIMIENTO DEL MOTOR, NO DUDE EN ADQUIRIR LOS IMPULSORES SHERWOOD ORIGINALES.**

**Sherwood suggests three easy tips to help you install your new impeller:**

- 1 Use a Non-petroleum based lubricant (i.e. silicone or soapy water) to help slide the impeller.
- 2 Install the impeller with a twisting motion onto the shaft. Never force the impeller onto the shaft. The impeller must move freely on the shaft to properly prime and function.
- 3 Use a small amount of Non-petroleum based lubricant to help hold the o-ring when replacing the cover.

SHERWOOD recommends inspecting your impeller closely during any pump maintenance. Replace the impeller if you discover either of the following: tear or rip on any of the impeller blades. Flex the blades to examine more thoroughly.

**THE 1 REASON FOR PREMATURE ENGINE WEAR IS OVERHEATING. TO MAINTAIN ENGINE PERFORMANCE, INSIST UPON GENUINE SHERWOOD IMPELLERS**

**SHERWOOD consiglia tre semplici accorgimenti per l'installazione di una girante nuova:**

- 1 Utilizzare un lubrificante con una base che Non derivi dal petrolio (per esempio silicone, o acqua insaponata).
- 2 Montare la girante con un movimento rotatorio, tenendo conto che essa deve muoversi liberamente per un corretto funzionamento. Non spingere mai la girante sopra l'asse.
- 3 Applicare una piccola quantità di lubrificante, posizionare l'anello di tenuta nella posizione corretta, quindi, procedere a montare il coperchio.

SHERWOOD raccomanda ispezionare attentamente la girante, e si osserva il seguente: strappatura o rottura di una o più pale, provvedere a sostituirla.

**IL RISCALDAMENTO È LA CAUSA PRINCIPALE DEL CONSUMO DEL MOTORE. PER MANTENERE UN BUON RENDIMENTO DEL MOTORE NON DUBITARE AD ACQUISTARE LE GIRANTI SHERWOOD ORIGINALI**

### GARANTÍA LIMITADA

	Embarcaciones de recreo	Embarcaciones comerciales o charters
LONG BLOCKS		
SHORT BLOCKS	12 Meses (Partes y mano de obra)	6 meses (Partes y mano de obra)
PERFORMANCE LONG BLOCKS		NO HAY GARANTÍA

Recambios Marinos decidirá si reemplaza las partes defectuosas o el motor completo. Todas las reparaciones las efectuará a su cargo el vendedor/distribuidor incluyendo la mano de obra aplicable según la Política de Mano de Obra detallada más adelante. **ES IMPRESCINDIBLE LA AUTORIZACIÓN DE RECAMBIOS MARINOS ANTES DE COMENZAR ALGUNA REPARACIÓN EN GARANTÍA.** Puede contactar con Recambios Marinos para conseguir el número de autorización. Las reparaciones o reemplazos de motor no alargan la validez de esta Garantía Limitada.

#### TRANSFERIBLE

Esta garantía es transferible y no está limitada al último comprador/propietario en el momento de la venta.

#### MANO DE OBRA

Recambios Marinos pagará la mano de obra sólo en reparaciones efectuadas en establecimientos autorizados. Recambios Marinos no se hace responsable de pagar mano de obra en reparaciones efectuadas por terceros que no estén certificados como mecánicos navales (Certificado de titulación correspondiente). En ningún caso, el total que se abonará por mano de obra superará los 400€ para barcos de hasta 20 pies, ó 470€ para barcos cabinados de 21 pies o superiores.

#### OBLIGACIONES DEL COMPRADOR

Pasadas 10 horas de la puesta en marcha del motor, el último comprador/propietario debe asegurarse de que un establecimiento autorizado y cualificado revisa el motor. Esta revisión debe incluir como mínimo: el ajuste de levas (si procede), ajuste de válvulas, ajustes del distribuidor y carburador, reapriete de los tornillos (First

Mate Marine recomienda reapretarlos independientemente del tipo de junta), cambiar el aceite y el filtro de aceite.

Vigile cuidadosamente los niveles de aceite durante las 100 primeras horas de funcionamiento ya que el consumo de aceite podría ser superior durante este periodo. Utilice aceite de motor de calidad con el grado y viscosidad apropiados y que recomienda el fabricante de los motores originales. First Mate Marine recomienda no utilizar aceites sintéticos o no detergentes el uso de los cuales anularía totalmente esta garantía. Una adecuada presión de aceite y lubricación son obligatorias para el buen funcionamiento del motor. Todas las embarcaciones deben estar equipadas con relojes o luces que indiquen la temperatura y presión de aceite del motor. **NO HAGA FUNCIONAR EL MOTOR EN CASO DE DETECTAR UNA PRESIÓN DE ACEITE O TEMPERATURA DEL AGUA INADECUADAS.**

Después de poner el motor en marcha, evite RPM excesivas y mantenga el barco planeando. Adapte las RPM durante las 3 a 5 primeras horas de funcionamiento. Unas RPM demasiado elevadas pueden dañar el motor causando fricción y recalentamiento. Evite largos periodos al ralentí. El calentamiento y fallo del motor debido a falta de lubricación se puede prevenir si se monitoriza a través de los relojes y de las luces de aviso. La negligencia del comprador no puede en ningún caso ser el motivo de los daños ocasionados al motor.

## LIMITACIONES Y EXCLUSIONES

Cualquier otra garantía (incluyendo las que haya extendido el vendedor o que se hayan extendido para un propósito particular), quedan excluidas y ninguna de ellas variará la validez o condiciones de esta garantía facilitada por Recambios Marinos. Asimismo, no existirá ningún acuerdo verbal facilitado por terceras personas, distribuidor o vendedor que modifique los límites de la garantía.

Recambios Marinos no será responsable de:

1. Daños o reparaciones ocasionados a consecuencia de una instalación defectuosa, mal uso del motor, servicio técnico inadecuado, alteraciones o modificaciones no autorizadas.
2. Piezas no suministradas por Recambios Marinos (incluyendo cárter, colectores y tapas, bombas de agua, distribuidor y carburador o sistemas de inyección de combustible) u otras.

4. Daños que resulten de una prelubricación inadecuada del motor antes de su puesta en marcha.

No se podrán reclamar otros gastos (directos o indirectos) como pérdida de beneficios, ventas perdidas, daños a otra persona o propiedad, remolque del barco, aceites, lubricantes, filtros, anti-congelantes, juntas, gastos de envío, etc.

## LIMITED WARRANTY

	Pleasure Craft Boats	Commercial or Charter Boats
LONG BLOCKS		
SHORT BLOCKS	12 Months (Parts & Labor)	6 Months (Parts & Labor)
PERFORMANCE LONG BLOCKS		NO WARRANTY

Recambios Marinos will, at its sole discretion, replace defective parts or a complete engine. All repairs will be made at the seller's or distributor's costs, plus applicable labor pursuant to the labor policy set forth below. **PRIOR AUTHORIZATION IS REQUIRED FROM FIRST MATE MARINE ENGINES BEFORE WARRANTY WORK IS BEGUN.** Call Recambios Marinos for a numbered authorization. Repairs or replacements do not extend this Limited Warranty.

### TRANSFERABLE

This warranty is transferable and is not limited to the ultimate purchaser/owner at the time of sale.

### LABOR POLICY

Recambios Marinos will pay labor claims only to repair facilities it has authorized and will only pay labor claims that the purchaser actually incurs as an out of pocket expense. First Mate Marine will not be liable for or pay any labor claims on Recambios Marinos installed by any third party who is not a certified marine mechanic (Marine Certificate or equivalent) it has authorized to perform repair work and will not pay any labor claims on engines installed in whole or in part by purchaser. In no event shall the total value of this limited warranty whether paid or made in kind, exceed the original distribution price of the engine purchased plus an additional amount of labor cost not to exceed 400€ for all boats 20 foot or shorter, 470€ for cabin cruisers 21 foot or longer.

### OWNER OBLIGATIONS

After 10 hours upon initial startup, ultimate purchaser/owner shall assure that a certified licensed and qualified mechanic authorized by First Mate Marine inspects your engine, which inspection should include, but is not limited to, adjustment of the tappets (if applicable) adjustment of valves, timing and carburetor adjustments, tightening of gasket bolts (First Mate Marine recommends retorquing gasket bolts

regardless of gasket type), and a change of oil and oil filter. Carefully monitor oil levels for the first 100 hours as oil consumption may be higher during this period. Use good quality motor oil of the appropriate grade and viscosity as recommended by the original engine manufacturer. First Mate Marine recommends against the use of synthetic oils or non-detergents oils, the use of which by the purchaser shall void this Limited Warranty. Proper oil pressure and lubrication are mandatory for good engine break-in. All boats should be equipped with gauges or lights to indicate engine temperature and oil pressure. **DO NOT OPERATE BOAT WITH ABNORMAL OIL PRESSURE OR WATER TEMPERATURE.**

After initial startup, avoid excessive RPM and keep boat on plane. Vary RPM range for the first 3 to 5 hours of running time. High engine RPM may damage your new engine through friction and high temperatures. Avoid long periods of idling. Engine overheating and engine failure due to the lack of lubrication can be prevented by adequate monitoring of all gauges or lights and should never in the absence of neglect by the purchaser result in engine damage.

## MANODOPERA

Recambios Marinos, s.l. solo paga le spese di manodopera per le riparazioni effettuate in officine autorizzate. First Mate Marine non si fa responsabile di pagare manodopera in riparazioni effettuate da terzi che non sono certificati come meccanici navali (Attestato corrispondente). ## GLI OBBLIGHI DELL'ACQUIRENTE

Monitorare attentamente i livelli dell'olio durante le prime 100 ore di funzionamento, il consumo di olio potrebbe essere maggiore in questo periodo. Usare un olio di qualità con il giusto grado di viscosità e raccomandato dal costruttore del motore originale. First Mate Marine consiglia di non utilizzare oli o detersivi sintetici l'uso dei quali annullerà totalmente questa garanzia. Un'adeguata pressione dell'olio e la lubrificazione sono obbligatori per il corretto funzionamento del motore. Tutte le imbarcazioni devono essere dotate di orologi o spie che indicano la temperatura motore e pressione dell'olio. **NON FAR GIRARE IL MOTORE IN CASO DI RILEVAMENTO DI UNA INSUFFICIENTE PRESIONE OLIO O DI UNA TEMPERATURA ACQUA INADEGUATA.**

Dopo l'avviamento del motore, evitare accelerare a elevati numeri di giri e lasciare l'imbarcazione planare. Adattare il REGIME durante la 3 a 5 ore di funzionamento. Accelerare a GIRI troppo elevati può causare danni e surriscaldamento al motore e conseguente attrito. Evitare lunghi periodi al minimo. Il surriscaldamento e il guasto del motore a causa della mancanza di lubrificazione può essere evitata se viene monitorato attraverso gli orologi e le spie. La negligenza da parte dell'acquirente per i danni causati al motore annulla automaticamente la garanzia.
